

AKSHAT MEHRA

Noida, Uttar Pradesh, India | +91 9540741195 | cyberexpert.akshatmehra@gmail.com

PROFESSIONAL SUMMARY

Entry-level Full-Stack Developer with hands-on experience building web applications using JavaScript, React, Node.js, and Express.js. Skilled in developing REST APIs and working with relational and non-relational databases including MySQL, PostgreSQL, and MongoDB. Proficient in modern frontend tooling (Vite, Tailwind CSS) and core computer science fundamentals (DSA, OOP, DBMS). Seeking an entry-level Software Developer / Frontend Developer role to apply strong problem-solving skills and contribute to real-world software projects.

EDUCATION

Bachelor of Computer Applications (BCA)

Institute of Management Studies, Noida, India | Expected 2026

Coursework focused on core computer science concepts, software development practices, and application building; gained practical exposure through academic projects and labs.

PROJECTS

E-Commerce Website | React, JavaScript, HTML, CSS, Vite

- Developed a responsive online store interface featuring dynamic product listings and reusable components.
- Implemented Vite for a faster, optimized development workflow.

Hotel Management System | Python, MySQL

- Built a hotel record and booking management system supporting full CRUD operations.
- Integrated MySQL to store and manage customer, room, and booking data.

Chatbot Interface | React, JavaScript, HTML, CSS, Vite

- Designed and built a component-based chatbot UI with structured message flow.
- Used Vite to improve development speed and build performance.

Financial Advisor (Group Project) | JavaScript, HTML, CSS

- Built a budgeting and financial guidance tool to help users track personal finances.
- Implemented UI logic, event handling, and interactive components as part of a collaborative team.
